

PRATHAM PACHAPUR

MECHATRONICS ENGINEERING STUDENT | IoT & ROBOTICS | CAD & PRODUCT DESIGN

Mumbai, India | prathampiitm0409@gmail.com | pratham.pachapur12@nmims.in
linkedin.com/in/pratham-pachapur-crimzyy | github.com/ltzz-crimzyy | myportfoliocrimzyy.vercel.app

SKILLS

ROBOTICS & EMBEDDED

Arduino, Raspberry Pi, Microcontrollers, IoT, Robotics

PROGRAMMING

C, C++, Python

CAD & DESIGN

AutoCAD, Autodesk Fusion, Onshape, Adobe Photoshop

MEDIA

DaVinci Resolve, Video Editing

AI & PRODUCTIVITY

Google Workspace, Gemini, Prompt Engineering

PROFILE

First-year **Mechatronics, Robotics & Automation** student at NMIMS MPSTME who builds things that run: **Arduino robots**, a **Raspberry Pi soccer bot** and a **Robocon stair-climbing mechanism**. Active in **three campus teams** across robotics, design and research. Seeking a **robotics or IoT internship**.

EDUCATION

B.Tech, Mechatronics, Robotics & Automation Engineering

SVKM's NMIMS Mukesh Patel School of Technology Management & Engineering, Mumbai | **2026 - 2030**

HSC Science (Class XII), Jai Bharat Jr. College of Commerce and Science | **2024 - 2026** | **80.00%**

SSC (Class X), Vani Vidyalaya High School & Jr. College | **2018 - 2024** | **90.4%**

PROJECTS

Obstacle Avoidance Autonomous Robot [ARDUINO](#) | [L298N](#) | [C++](#)

- Built a **fully autonomous** two-motor robot that detects obstacles and steers around them.
- Wrote the **Arduino firmware** and wired the L298N driver for motor direction and speed control.

4WD Autonomous Soccer Robot [RASPBERRY PI 3](#) | [ARDUINO UNO](#) | [SERVOS](#)

- Designing a **four-wheel-drive** robot with 12V motors and servo arms for a college challenge.
- Split control between Pi (decisions) and Arduino (motors, servos); prepared **BOM and circuit diagram**.

Builder Robot - ABU Robocon 2027 [ONSHAPE](#) | [AUTOCAD](#)

- Researching and designing the **stair-climbing mechanism** with Team Technotix.
- Authoring the design report for the *Pursuit of Mustika Nusantara* theme.

SWARM_SAR Quadruped Spider Bot (Planned) [ARDUINO UNO](#) | [12 SERVOS](#) | [12 DOF](#)

- Semi-autonomous **12-DOF** spider robot for **surveillance and search & rescue**.
- Four legs, three **9G servos** each, driven by an Arduino UNO on a 2x18650 supply.

EXPERIENCE

Tech & Research Executive

4C - Marketing Cell of NMIMS | **Aug 2026 - Present**

- Technical research and prototyping in C++ and Python.

IoT / Robotics Executive

Google Developer Group on Campus, NMIMS MPSTME | **Aug 2026 - Present**

- IoT and robotics activities for the campus developer community; CAD modelling.

Design Executive

Technotix MPSTME | **Aug 2026 - Present**

- Mechanical design in AutoCAD and Onshape for competition robots.

SMCW Executive

IET MPSTME On Campus | **Aug 2026 - Sep 2026**

- Produced video edits, graphics and social content for chapter events.
